

Information at your fingertips.

## Internet Merchant Workstation

eMerchantView is an innovative new product that makes a wide variety of merchant bankcard account information available to merchants through their personal computer.

The Merchant Workstation is an Internet-based solution, which allows you direct access to your credit card transaction processing information. This information will include your:

- Batch deposit information and transaction details (*six months of history*)
- Chargeback information (*six months of history*)
- Retrieval information (*six months of history*)
- Cardholder account inquiries (*six months of monetary history*)
- Statement (*three months of history*)

This service is designed to save time, and make you more productive by delivering information directly to your personal computer. Using simple, point-and-click commands, you can retrieve the information that you currently do not have available at your fingertips in such a timely manner.

**A faster and easier way for merchants to view their bankcard information.**

Powerful features let you look at summary level information, or drill down to transaction details. This product greatly simplifies the wide variety of tasks that you need to maintain or improve financial control of your business.

eMerchantView gives you the tools that you need to manage your bankcard business.
